CALIBRATION • TRAINING • COMMISSIONING • ASSET MANAGEMENT

Calibration

- A2LA accredited laboratory calibration services available in accordance with ISO 17025
- Two factory facilities for laboratory calibration - Greenwood, IN up to 48". La Porte, TX up to 8"
- Keep all your processes working reliably and your devices in spec
- Compliant calibration ensures the safety of your processes and products

Deliverables

- Traceable calibration of any measurement instrument
- Comprehensive calibration certificate with conformity statement
- Centralized access to all your calibration results (on demand)

Asset Management

- W@M Portal – Cloud Based Asset Management Service
- Fieldcare – PC based Instrument Management Software

Training

- PTU (Process Training Unit) – Full-scale mini-process plants with on-line instrumentation, valves and controls
- We can customize our training to meet your needs at a location convenient for you. At your site or online

Engineering Services

- Turnkey solutions from design to execution

ON-SITE SERVICES

Endress+Hauser  - Authorized Service Provider

Mobile Calibration

- A2LA accredited field calibration services available in accordance with ISO 17025
- Flow instruments will include line sizes up to 2" (rig) and 4" (in-line) with the following uncertainties: Mass (e.g. Coriolis \pm 0.12%), volumetric (e.g. Magmeters and Vortex \pm 0.17%)
- NIST traceable master flowmeter
- Flow meter verification services
- All brands of instrumentation

Start-up & Commissioning

- Have your process up and running on time and on budget – Complete Project Commissioning Services
- Extended warranties available with start-up services – 3 years included and 5 years with added per instrument charge

Training

- We can train your technicians on-site for instrumentation start-up, troubleshooting, calibration and verification
